

NON-IRRADIATED STATEMENT

To whom it may concern,

The products supplied by OrganicCrops, including cacao products, dehydrated fruit and vegetable powders, concentrates and extracts, pulps, grains, and seeds, have not been treated with ionising radiation at any stage of production, processing, storage, or shipment.

Statement of Compliance

1. None of the listed products have been subjected to ionising radiation (gamma rays, electron beams, or X-rays) for preservation, pest control, or microbial reduction.
2. All products are processed using traditional physical and mechanical methods, such as cleaning, drying, grinding, pressing, or filtering, without exposure to any irradiation treatments.
3. Based on our supplier declarations, production protocols, and quality management systems, there is no risk of cross-contamination with irradiated materials.
4. The products are therefore considered non-irradiated within the meaning of Australia New Zealand Food Standards Code, Standard 1.5.3 – Irradiation of Food, and Regulation (EU) 2015/2283 (where applicable).

Australian Regulatory Context

Under Australian regulations, foods that have not been irradiated do not require a “non-irradiated” label. However, any product that has been treated with ionising radiation must be clearly declared as such (e.g., “treated with ionising radiation” or “irradiated [name of food]”).

OrganicCrops confirms that none of its products fall within the category of irradiated foods requiring such labelling.
